## HR Directory 365 API Permission Approval Guide

Once you added this solution on your SharePoint environment, you need to approval a couple of APIs permissions.

Open your SharePoint admin center home menu and click on API management under the Advance left menu option to see the currently pending permission requests. Notice that the request for **User.ReadAll** and **User.ReadBasic.All** permission for in Graph API is pending for approval.

Note: Sometimes API Access option may be not visible on your home page, so you must upgrade it or activate the new features in office 365 admin panel.
