

# How a financial firm improved HR efficiency with a customized interactive **office floor plan** module

## About the Client

**Our client, a financial firm based in St. Louis, Missouri, USA,** specializes in providing comprehensive financial planning and investment management services to individuals and families.

## Problems/Challenges

The client had already subscribed to Beyond Intranet's HR Directory software, a comprehensive employee directory solution. However, they required customization to incorporate the office floor plan module, enabling them to view interactive office floorplan and locate their employee's seating locations. This posed a challenge for efficient communication and collaboration within the organization.

The client was already leveraging Beyond Intranet's HR Directory 365, a comprehensive employee directory solution. The client then requested a custom office floor plan module to view interactive office floorplans and locate coworkers' desks. The reason why they requested this plan was to address challenges in effective communication across the organization, ultimately fostering a modern workplace.

## Solution

To address the above-mentioned challenge, Beyond Intranet proposed customizing the existing HR Directory software with interactive floor plans. The customization involved adding an office floor plan module that would enable users to easily check the office floor layout and find team members' **desks in the office**, streamlining the process and enhancing communication.

To initiate the project, Beyond Intranet worked closely with the client to gather specific customization requirements. They collaborated with the client's team to understand their needs and ensure a seamless integration of the office floorplan module.

To assist in the customization process, the client shared **11** office floor plan layout images with Beyond Intranet, which were essential for accurately implementing the office floor plan module. After receiving the layout images, Beyond Intranet **clarified to the client that any changes in the floor map plan/design would be treated as separate change requests to ensure proper implementation.**

The solution involved developing and integrating the customized office floor plan module into the client's existing Beyond Intranet's **HR Directory software**. Beyond Intranet adhered to best practices in software development throughout the process, ensuring a robust and reliable module.

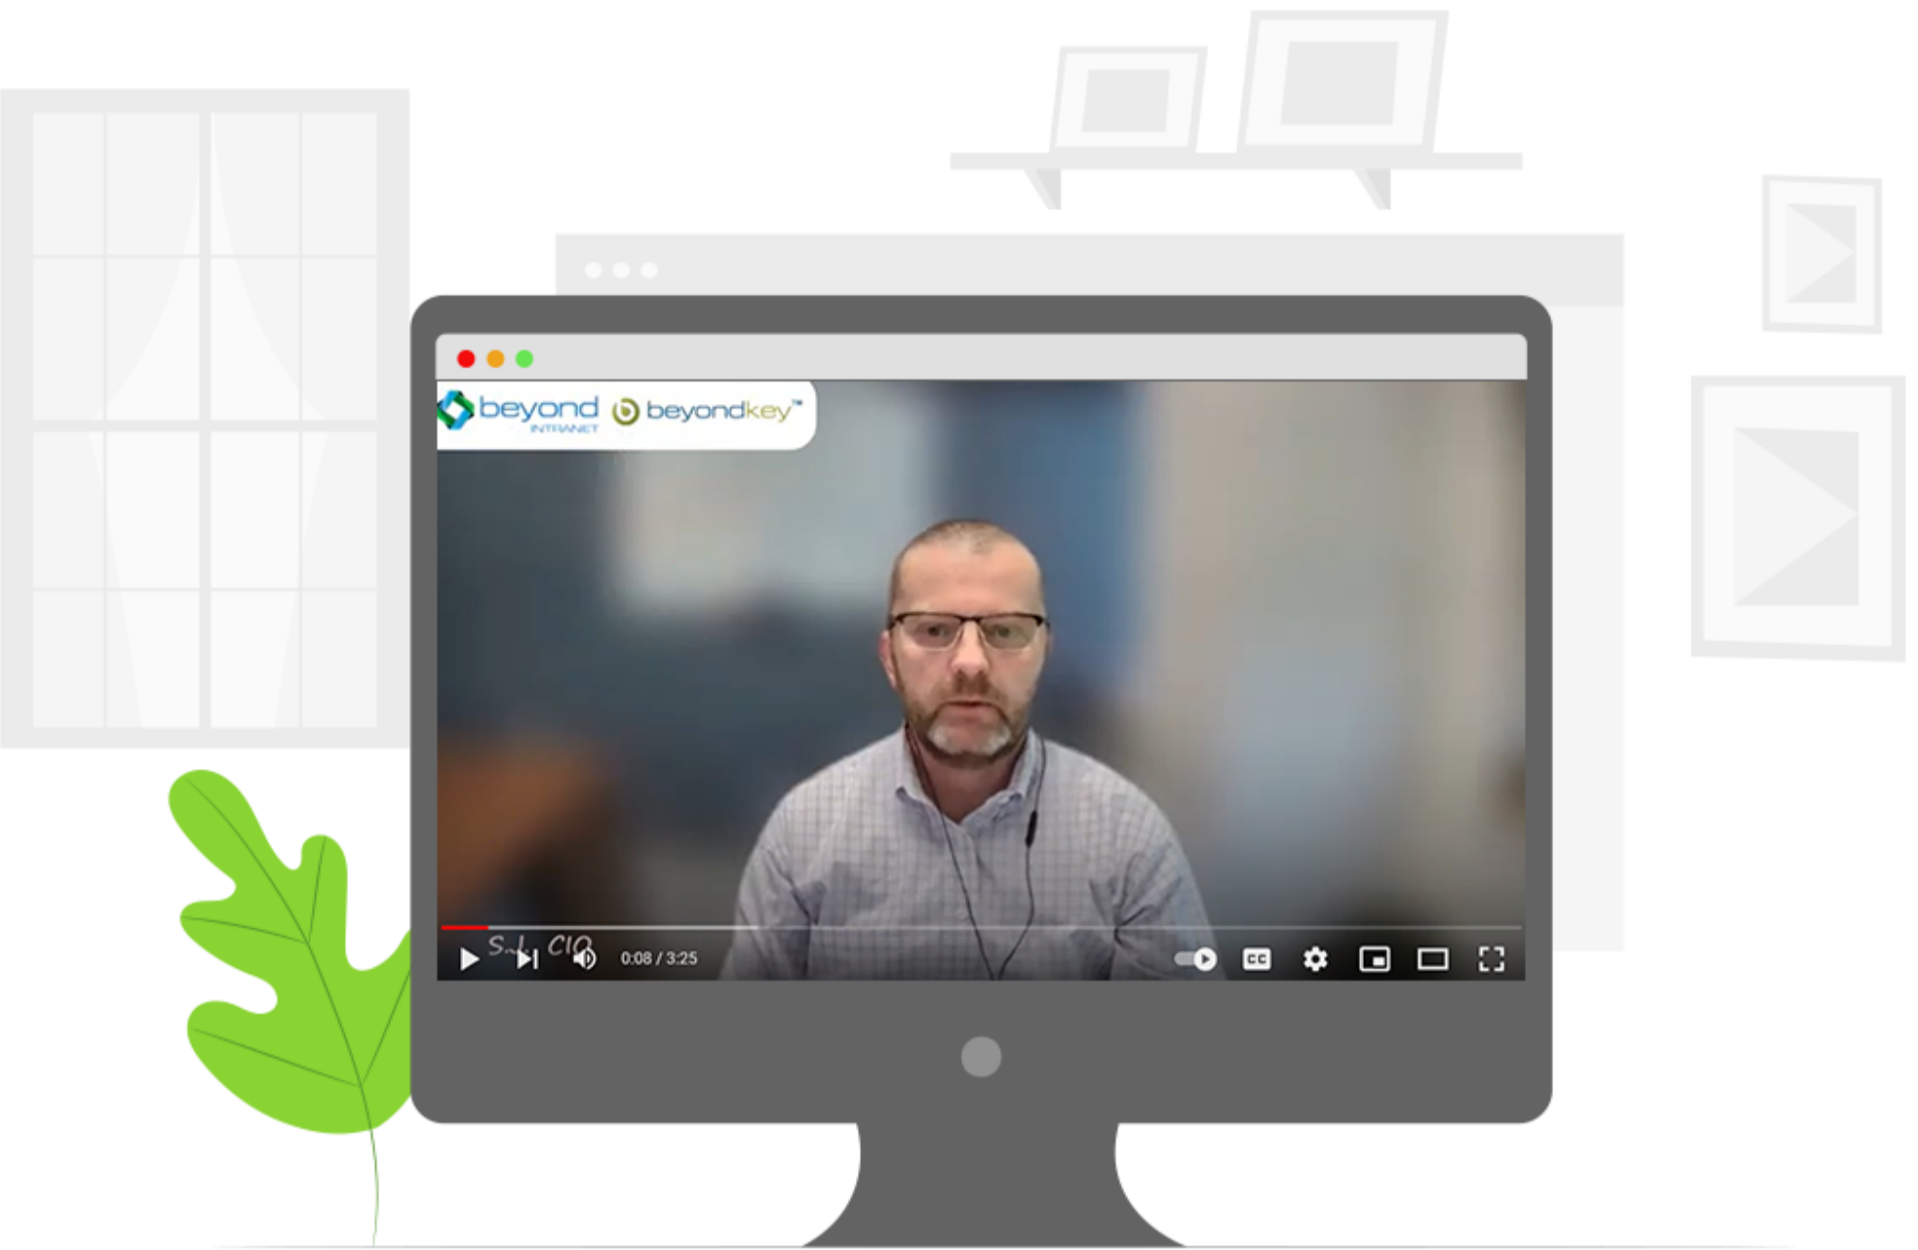

**Beyond Intranet** maintained open lines of communication with the client, providing regular updates on the progress and seeking feedback to ensure the solution aligned with their expectations.

## Results

The implementation of the new office floor plan module was a success. **Beyond Intranet's HR Directory application** now allows the client's users to swiftly and effortlessly locate employee's office seating location with an interactive floor plan. This improvement significantly enhanced efficiency and productivity within the client's **organization**.

The client's CIO shared his thoughts as well: "We tested Beyond Intranet's employee directory solution and were quickly able to deploy directories while receiving answers to all technical questions. Beyond Intranet then developed a floor maps directory as requested and provided white glove service. For us, Beyond Intranet is an invaluable part of the team."

## Conclusion

By providing a tailored solution to the HR Directory 365, Beyond Intranet successfully addressed the client's goal of enabling a bird-eye view search of their employees' seating locations across the organization. The addition of the office floor plan module improved collaboration, ultimately enhancing efficiency and productivity.

Throughout the project, Beyond Intranet followed industry best practices in software development and maintained effective communication with the client. This approach ensured that the project was delivered successfully, meeting the client's customization requirements and aligning with their expectations.

Overall, the collaboration between Beyond Intranet and the client, a reputed financial firm, resulted in a valuable enhancement to the HR Directory software, fostering improved efficiency and productivity within their organization. Contact us to learn how Beyond Intranet's HR Directory software, with the addition of the office floor plan, can supercharge communication and collaboration across your business.
